

PROJECT SPOTLIGHT

Precast Products South Africa

Project description

FIBSOL (Fibre Reinforcing Solutions) can assist in the design of alternative reinforcing solutions consisting of combinations of fibres and steel for any type of precast application. **Our Macrosol fibres** not only offer improved ductility and crack resistance but also provide enhanced impact and abrasion resistance while the **Microsol fibres** prevent and eliminate cracks formed in the plastic state of the concrete resulting in fewer breakages and damaged products.

PROJECT DATA

Location: **South Africa**
Application Type: **Precast Concrete**
Concrete Quality: **15 to 25 Mpa**
Thickness: **20 mm to 100 mm**
Contractor: **Various**
Fibre Type: **Macrosol X, F &
Microsol 12 mm**
